

We can offer website design, hosting and domain registration as a package OR as individual services.

Domain names are always registered to the clients details and are renewed EVERY 2 YEARS.

Website hosting starts at £84 per year (£7 pcm) for up to 10 pages and is billable annually.

As a rule of thumb, websites can be worked out at approximately £100 per page and from £300 upwards.

The average spend of a website is between £800-£1000

Most small “brochure style” websites can be completed within 2-3 weeks (subject to work schedule).

All content must be supplied by the client. Where required, we can offer a copywriting service.

All additional design and copywriting services are charged at £40 per hour outside of any package prices.

We are always willing to discuss clients requirements over the phone or by arranging a visit.

As an “all service” design agency, we also offer logo and print design services i.e. business cards, letterheads etc and can obtain print production quotes on request.
