

Web Developer Full or Part-Time

Web developer required with qualified coding and programming experience in LAMP solution stack: Linux, Apache, MySQL and PHP.

This position offers the right candidate a unique opportunity to join one of the West Country's leading publishers with over 45 years growth in the publishing and digital media industries.

This position is perfect for a hard working, self-motivated and enthusiastic web developer who is looking to really make a mark as a key member of a busy web design team within a well-established and successful company.

Maintaining and further developing the company's online directory and providing some technical input and support for iOS and Android Apps together with a variety of bespoke development for client sites, your technical expertise should include LAMP stack with thorough knowledge of:

- PHP and very good knowledge of Linux, Apache and MySQL
- Good knowledge of a MVC framework (preferably CodeIgniter) would be an advantage
- Proficient knowledge of Javascript, jQuery, HTML and CSS is essential to assist the web designers
- Salary (pro-rata for part time) will be determined by proven and demonstrable web development experience

If this role is you please get in touch – forward your CV to info@dentonscreative.com or call Dentons on 01373 822224 and ask to speak to Mutamba.
